

Andrew Ngo

ango@udel.edu — (302)-357-5499 — <https://andrewango.vercel.app>

Experience

Handshake AI Fellowship

Annotation Reviewer

Remote

Jun. 2026 - Present

- Reviewed ranked evaluations of responses from frontier large language models (LLMs) on multi-turn software engineering and coding tasks, maintaining high standards for evaluation quality and consistency.

NASA Ames Research Center

Data Scientist - Volunteer

Remote

Nov. 2025 - Present

- Investigating detection and tracking methods for global solar activity forecasting for physics and mission safety.

Beacon Industries

AI/ML Engineer

Newington, CT

Sep. 2025 - May 2026

- Improved satellite maneuver stability by an estimated 66% in 3 ANSYS STK orbital simulations by training and evaluating reinforcement learning agents using PPO and actor-critic algorithms in PyTorch.
- Built and deployed ML applications for SBIR stakeholders using AWS Lambda, Docker, ECR, CloudWatch, Weaviate, FastAPI, and React for containerization and ETL pipelines in inference and RAG workflows.
- Proposed signal processing approaches, including faint-object detection and tracking in space using tomography with false-alarm reduction, and secure optical communications; presented to DARPA, NASA, and the U.S. Space and Air Force.
- Reduced projected lifecycle costs by \$3M per decade by increasing wind tunnel strain resolution 3x on aircraft sensors through signal processing simulations and data acquisition pipelines in MATLAB Simulink and Python.
- Led the security architecture and NIST 800-171 implementation for CMMC Level 2 readiness across Azure cloud, identity, network, and data governance systems for an ITAR-regulated defense manufacturing site with 100 users.

NASA Ames Research Center

Data Scientist Intern

Remote

Jun. 2023 - Aug. 2023; Jun. 2024 - Aug. 2024

- Automated a previously manual solar feature detection workflow using OpenCV and AstroPy, enabling 10x faster analysis across large solar image datasets (paper in review).
- Trained TensorFlow models for solar limb alignment, improving data quality and downstream calculations by over 50%.
- Reduced runtime by 25% on large observational datasets by parallelizing solar image processing workflows.

Sensify Lab

Machine Learning Engineer Intern

Newark, DE

Sep. 2023 - May 2024

- Achieved 79% rating classification accuracy on 200K+ app reviews by training BERT models in PyTorch.
- Improved depression and anxiety prediction accuracy from 70% to 75% using Random Forests and SVMs.

Education

University of Delaware - B.S. Applied Mathematics; B.S. Computer Science

Sep. 2021 - May 2025

GPA: 3.86 / 4.0

- Graduate-Level Coursework: Machine Learning, Artificial Intelligence, Mathematical Data Science, Linear Algebra, Probability & Random Processes

Skills

- Languages: Python, C++, SQL, MATLAB, TypeScript, JavaScript
- ML/AI: PyTorch, TensorFlow, CUDA, Computer Vision, Reinforcement Learning, Deep Learning
- Tools/Platforms: AWS, Docker, Git, FastAPI, Weaviate, React, ANSYS STK, OpenCV, MATLAB Simulink, Azure Security, Power BI, Power Automate, Linux
